

What We Do

Xero Receipt Automation for South African Businesses

The Problem: Manual Receipt Management Costs You Time & Money

South African SMEs using Xero spend hours each week manually creating and sending receipts. This repetitive task pulls you away from revenue-generating activities, creates delays in customer communication, and increases the risk of SARS VAT compliance errors.

- ■ **5+ hours per week** wasted on manual receipt creation and email sending
- **Delayed communication** customers wait days for payment confirmation
- ■ **Compliance risk** manual processes increase VAT documentation errors
- **Unprofessional image** generic email receipts don't reflect your brand

Our Solution: Automated, Branded, SARS-Compliant Receipts

Contemplation Software connects directly to your Xero account. When an invoice is marked as paid, we automatically generate a professional, branded PDF receipt and email it to your customer—instantly. No manual work. No delays. No compliance worries.

- ✓ **Instant automation** Receipts sent within seconds of Xero payment confirmation
- ✓ **SARS VAT compliant** All receipts include required VAT registration and tax details
- ✓ **Your branding** Professional PDFs with your logo, colors, and company details
- ✓ **POPIA aligned** Secure data handling that meets SA privacy requirements

How It Works: Simple 3-Step Setup

- 1 Connect** We integrate with your existing Xero account via secure webhook
- 2 Customize** We configure your branded receipt template with your logo and details
- 3 Automate** Receipts are automatically generated and emailed when invoices are paid

Why Contemplation Software?

- ■ **SA-Based Expertise** Cape Town team that understands SARS requirements and local business needs
- **Custom Solutions** Python + n8n automation tailored to your specific workflow
- **Consultant Model** No monthly subscriptions—pay for setup, own the solution

Secure & Compliant

POPIA-aligned data handling with enterprise-grade security
